Pollution Control Project Funded in Pike County

26 County Conservation Districts Received Funding to Promote Water Pollution Prevention Strategies across Pennsylvania

Pike County Conservation District received \$1,000 to develop an educational brochure that will include a step-by-step guide to help homeowners better understand the process of completing the most common General Permits: GP #2 for Small Docks and GP #3 for Streambank Stabilization.

“This grant funding will allow the conservation district staff to reduce pollution in our communities. Working together, we can all do our part to ensure there is enough clean water for future generations,” said PCCD Executive Director Michele Long.

Education and outreach about the project is expected to begin this fall. The district expects to have the project work begin no later than October 2018.

Twenty-six projects will be funded in twenty-six of the state’s counties. Projects include agricultural field days, forestry workshops, rain barrel workshops, safe medication disposal, and more. For a complete listing of awarded projects, visit <https://goo.gl/WBqRkx>.

For more information about the Pike County Conservation District, visit PikeConservation.org or call 570-226-8220.

Financial and other support for this project is provided by the Pennsylvania Association of Conservation Districts, Inc. (PACD) through a grant from the Pennsylvania Department of Environmental Protection under Section 319 of the Clean Water Act, administered by the U.S. Environmental Protection Agency. For more information about PACD, visit www.pacd.org.

###

Pike County Conservation District (PCCD) is committed to natural resources conservation through leadership, education, technical assistance, planning and enforcement to ensure the long term protection and sustainable use of Pike County’s natural resources and implementation of environmentally sound development and land use practices.
